

Bibliography on the Ethical, Legal, and Social Implications (ELSI) of Advanced Biopreservation Technologies (2000-2024)

Last revised: July 30, 2024

Prepared by Claire Colby, JD Candidate, University of Minnesota Law School, working with Professors Susan M. Wolf and Timothy L. Pruett; Revised by Michael Van Ryn, JD Candidate, University of Minnesota Law School, and Lowell Wolfe, JD Candidate, University of Minnesota Law School

Introduction: This bibliography contains resources on the ethical, legal, and social implications (ELSI) of advanced biopreservation. The bibliography also includes information about ethical frameworks used to analyze emerging technology. Because this advanced biopreservation technology remains in early stages of development, dedicated ELSI literature about specific envisioned applications of this technology is relatively scarce. This bibliography includes that literature and provides resources for ELSI issues relevant to the various use cases. This document centers on ELSI issues and does not seek to replicate the full scientific literature for each application area. As such, the bibliography generally features articles that reference ELSI issues and excludes more technical resources. This bibliography is **limited to sources published in or after the year 2000**, and sources published in English.

This bibliography was prepared as work for ATP-Bio. ATP-Bio is an NSF Engineering Research Center (ERC) supported by grant no. EEC 1941543. ATP-Bio is co-led by the University of Minnesota's Institute for Engineering in Medicine and Massachusetts General Hospital's Center for Engineering in Medicine and Surgery. More information about ATP-Bio can be found [here](#). To suggest additional resources for this bibliography, please email Consortium on Law and Values Senior Administrative Director Dori Henderson at hend0054@umn.edu.

This bibliography is organized into **eight topical areas**. Readers may navigate to each section and subsection by clicking the corresponding text in the Table of Contents. Within each subsection, entries are listed alphabetically by the first author or for full books, by editor. For subsections with multiple articles from a single author, these resources are then further organized by year. Many of the resources contained in this bibliography could be cross-listed in multiple sections, but each is listed only once.

Sources and sections added and edited since the previous iteration of this bibliography (August 7, 2022) are marked with an asterisk (*) at the beginning of the source.

Table of Contents

I.	Ethics and Policy Issues Raised by Advanced Biopreservation	3
II.	Guidance for Responsible Innovation	4
A.	Responsible Innovation/Risk Innovation	4
B.	Anticipatory Governance/Governance of Emerging Technologies	5
C.	Ethical Innovation in Nanotechnology	6
D.	Public Opinion on Emerging Technologies	7
E.	Engagement of Stakeholders and Interested Parties*	8
III.	Organ Transplantation	8
A.	Ethics and Regulatory Sources	8
B.	Applications -- ELSI issues	10
1.	Commercialization, Exploitation, and Trafficking	10
2.	Equitable Allocation of Organs	11
3.	Human Testing of Manipulated Organs	12
IV.	Cells, Tissues, and Other Medical Products of Human Origin	13
A.	Ethics and Regulatory Sources	13
B.	Applications -- ELSI Issues	15
1.	Biobanking	15
2.	Production and Scaling Up of Cell Therapies	16
V.	Microphysiological Systems and Organoids	16
A.	Ethics and Regulatory Sources	16
B.	Applications -- ELSI Issues	17
VI.	Whole Organisms	18
A.	Model Organisms and Other Organisms*	18
1.	Ethics and Regulatory Sources	18
2.	Applications --ELSI Issues	18
B.	Pathogens	19
1.	Ethics and Regulatory Sources	19

2. Applications--ELSI Issues	19
VII. Environmental Uses	20
A. Ethics and Regulatory Sources	20
B. Applications -- ELSI Issues	22
1. Biorepositories to Protect Biodiversity	22
2. Combining Advanced Biopreservation with Other Technologies (Like De-Extinction or Gene Drive Technology)	23
VIII. Aquaculture & Food Production	24
A. Ethics and Regulatory Sources	24
B. Applications -- ELSI Issues	25
